## DESIGN

### CONSTRUCTIVE DESIGN

All the materials used correspond to the requirements according to RAL-GZ 430/3

Single chair, metal base frame, form foam

Seat upholstery structure: zig-zag springs, form foam, Diolen

Back upholstery structure: form foam, Diolen

### UPHOLSTERY CASUAL / LOOSE

With casual upholsteries you are rather sitting „in the sofa“ than on it, the upholstery snuggles. A casual/loose upholstery is characterized by a smooth upholstery structure. The cover is not waveless. The ridge of the covers on the seat, back and armrests as well as sitzmarks due to the model and design are typical.

### BACK TENSIONING SECTIONS

All back tensioning sections are supplied as standard with the original cover.

## COMBINATION OF COVERING MATERIALS

If desired with this model two different covers can be combined.

Here must be indicated the respectively desired covering material with cover part 1 and cover part 2.

With combination of fabric and leather the leather price will be invoiced as standard.

Fabric- and leather requirement of each cover part on request.

 cover part 1: seat, back and armrest

 cover part 2: seat-, back and armrest tensioning section

## CONTRAST STITCHING

The production is carried out either **with contrast stitching** or with a **thread (tone on tone)** matching the leather in terms of colour.

### CONTRAST STITCHING

With leather covers and with fabric-leather-combinations a **contrast thread colour** must be explicitly chosen.

With bicoloured covers the thread colour will be worked on the front and on the rear side.

Unfortunately with fabric and microfiber covers without leather part a processing with contrast stitching is not possible.

**Exception fabrics 13-BISON, 13-CHASE and 13-TORRERO:** These fabrics can be produced with contrast stitching. A contrast thread colour must be explicitly chosen.

### THREAD TONE ON TONE

The model is worked with a thread matching the cover in terms of colour (tone on tone).

With bicoloured covers and with fabric-leather-combinations the matching thread will be automatically worked on the front and on the rear side.
